TrimAce

Product data sheet

Application and function:

TrimAce is a solid expansion absorbing trim that allows timber flooring to expand and contract up to 5mm.

The standard TrimAce product fits simply within a 14mm wide rebate at the floor edge or at its junction with another material without the need for bonding or fixing. TrimAce also available in a timber to rug interface.

Installation is simple, providing the rebate or slot is prepared in accordance with the TrimAce installation instructions.

Finish / Sizes:

TrimAce is available in two standard depths to suit the most commonly specified timber flooring products:

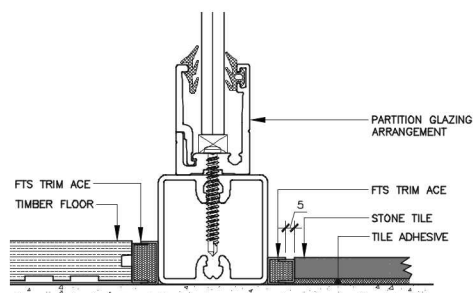

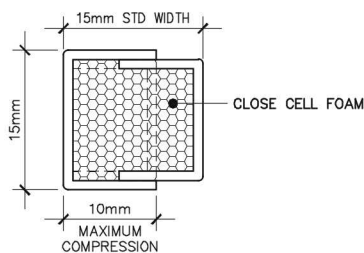

- 13mm & 15mm deep
- 2.5 meter lengths
- Pre-mitred corner sections

TrimAce is available in the following standard hard wearing powder coat finishes:

- Black - RAL 9005
- White - RAL 9016
- Grey/Beige - RAL 1019 (Mapei - sand 133)
- Mid grey - RAL 7038
- Dark grey - RAL 7012 / 7016
- Tiger bronze - RAL 8040

Special sizes and colours are available.

- 18mm & 21mm deep
- Polished / brushed stainless steel
- Polished / Brushed Solid brass
- Silver anodised
- Gold anodised

Performance:

TrimAce has been designed and tested to withstand 50kg of loading psi to ensure durability.

Installation:

Illustrative instructions will be provided showing method of construction.
